☒ Yes, I am subject to 40 CFR Part 63 Subpart HHHHHH, National Emission Standards for Hazardous Air Pollutants: Paint Stripping and Miscellaneous Surface Coating Operations at Area Source; Final Rule

a. I am a:

- ☒ Motor Vehicle or Mobile Equipment Surface Coating Operation
☐ Miscellaneous Surface Coating Operation
- b. Number of spray booths 1
- c. Number of preparation stations 1
- d. Number of painters usually employed 1

a. Methods of paint stripping employed (check all that apply)

- b. Substrates stripped (check all that apply)
☐ Wood ☒ Plastic ☒ Metal ☐ Other (please describe) _____

Do you plan to use more than 1 ton of MeCl annually? Yes ☐ No ☒

For paint stripping operations, the relevant requirements that you must evaluate in making this determination are specified in 40 CFR § 63.11173(a) through (d) of this subpart. For surface coating operations, the relevant requirements are specified in 40 CFR § 63.11173(e) through (g) of this subpart.

- ☒ I am already in compliance with each of the relevant requirements
- ☐ I will be in compliance with each of the relevant requirements by the compliance date

Example Petition for Exemption

Paint Stripping and Miscellaneous Surface Coating Operations

Area Source Rule

40 CFR Part 63 Subpart HHHHHH (§§ 63.11169 – 63.11180 and Table 1)

RECEIVE

DEC 20 2010

Approves & Inspection
Registration Branch
EPA

An exemption from the requirements of Subpart HHHHHH is case/fact specific. This Example Petition for Exemption is completed to illustrate the type of information that you might submit to request an exemption. You may use your own form as long as you include all the information required by the rule for a petition. We will respond to your petition after we have evaluated the information you provided.

In accordance with 40 CFR §63.11170(a)(2), an owner or operator of a motor vehicle or mobile equipment surface coating operation (including refinishing operations) may petition the United States Environmental Protection Agency (EPA) Administrator to exempt the operation from the surface coating regulatory requirements of 40 CFR Part 63 Subpart HHHHHH, if the owner or operator can demonstrate that the spray-applied coatings used by the facility do not contain target hazardous air pollutants (HAP) (paint stripping requirements still apply).

Note: in determining whether you spray apply target HAP containing coatings, do not include coatings applied using hand-held aerosol cans, or hand-held devices (e.g., spray guns) with a paint cup capacity of 3 fluid ounces or less. These are not considered spray-applied coatings under the rule. See, "spray-applied coating operations" definition at 40 CFR §63.11180.

As defined in 40 CFR §63.11180, coatings are "target HAP containing coatings" if they contain compounds of chromium (Cr), lead (Pb), nickel (Ni), cadmium (Cd), or manganese (Mn) above a given concentration. If a compound is not carcinogenic, then the rule allows a higher concentration of the compound before the coating is considered to be a target HAP containing coating, as described here:

- Coatings containing compounds of chromium (e.g., chromates) including hexavalent chromium (Cr+6) or trivalent chromium (Cr+3), lead (Pb), nickel (Ni), cadmium (Cd), or manganese (Mn) that are carcinogens and are present at more than 0.1% of the coating by mass are target HAP containing coatings.
- Coatings containing compounds of trivalent chromium (Cr+3) or manganese (Mn) that are not carcinogens, and are present at more than 1.0% of the coating by mass are also target HAP containing coatings.
- Refer to the coating Material Safety Data Sheets (MSDS) or obtain documentation from your supplier for each coating that you spray apply without mixing. If you mix coatings prior to application, determine the target HAP concentration for each coating mixture that you spray apply.

Location where your facility compliance records are maintained:

Street (b)(6) County Garland

City _____ State AR Zip 71901

2. Describe your surface coating operation and explain why your facility qualifies for the exemption under 40 CFR §63.11170 (a)(2). (For example: Our facility repairs automobile collision damage. We are seeking an exemption because we do not use any target HAP containing coatings.)

My Company specializes in repairing non-collision automotive paint and body damage. We are seeking an exemption because we do NOT use any coatings containing the targeted HAPS.

3. Description of Spray-Applied Coatings

Identify the manufacturer(s) and product line(s) of all the spray-applied coatings used at this facility. Attach additional pages to this petition, if necessary.

Manufacturer	Product Line
PPG Industries	Nexa Auto Color
" "	Omni

4. Certification Statement

I have consulted reliable analyses (material safety data sheets or information obtained from the coating manufacturer) of the coatings that are used in this facility and have determined that we do not spray apply target HAP containing coatings as defined in 40 CFR §63.11180. Furthermore, I have verified that none of the coatings mixed prior to application contain target HAP as spray-applied, based on the definition of "target HAP containing coatings". I certify, under penalty of law, to the truth, accuracy, and completeness of the information provided in this petition. If circumstances change such that we intend to spray apply target HAP containing coatings in surface coating operations, we will submit the initial notification required by 40 CFR §63.11175 and will comply with the requirements of 40 CFR Part 63 Subpart HHHHHH (the National Emission Standard for Hazardous Air Pollutants: Paint Stripping and Miscellaneous Surface Coating Operations at Area Sources). Spray application of target HAP containing coatings in a surface coating operation voids any exemption that might be granted as a result of this petition.

If your petition is approved, then you must keep a copy of the approval on site at your facility until you change your operation(s) to include spray application of target HAP containing coatings, or discontinue motor vehicle and mobile equipment surface coating operations.

This example format may be used to meet the Notification of Compliance Status requirements of Subpart HHHHHH; however, you are not required to use this format as long as you provide the information required by 40 CFR § 63.11175(b).

If you are the owner or operator of a new source, then you were required to certify in the initial notification whether the source was in compliance with each of the requirements of Subpart HHHHHH, as specified in 40 CFR § 63.11175(a)(8). Provided that you were able to certify compliance on the date of the initial notification, as part of the initial notification submitted as specified in 40 CFR § 63.11175(a), and your compliance status has not since changed, then you are not required to submit a separate notification of compliance status.

If you are the owner or operator of any existing source and did not certify in the initial notification that your source is already in compliance, then you must submit a notification of compliance status on or before March 11, 2011, as specified in 40 CFR § 63.11175(b). See 40 CFR § 63.11171 for identification of new and existing sources and 40 CFR § 63.11172 for rule compliance dates. A copy of this example format and a brochure on the rule are located at:
